

Bring lessons to life online

Digital tools for a more internationally connected classroom

Google Connected Classrooms - connectedclassrooms.withgoogle.com

Bring engaging, world renowned experts directly to your students with virtual field trips on Google+. Explore the site to learn more about past and upcoming field trips, and learn how to get your class connected.

Google Cultural Institute - google.com/culturalinstitute

Discover exhibits and collections from museums and archives around the world. Explore cultural treasures in extraordinary detail, from hidden gems to masterpieces.

Constitute - constituteproject.org

New constitutions are written every year. Constitute offers access to the world's constitutions, which students can systematically compare across a broad set of topics. Quickly find relevant passages, filter by topic, and save your work for further analysis.

Google Maps for Education - maps.google.com/help/maps/education

Google Maps for Education provides resources to help teachers and students explore, create, and collaborate with mapping tools. Google's geo products give you and your students easy access to the world's visual information.

Google Hangouts - google.com/+learnmore/hangouts

With Hangouts, you can create live video conferences recorded directly to YouTube. Can't have a speaker travel to your class? Use Google Hangouts and connect your students to anyone with a laptop and an Internet connection.

YouTube for EDU - youtube.com/edu

More than 100 hours of video is uploaded to YouTube each minute. With so much information, there are many channels and videos to help your students learn. Whether its a channel dedicated to education or a famous speech, there's a lot to explore.

Google Online Safety Center - google.com/safetycenter

Staying safe online is a shared responsibility, and a critical skill for teachers and students. Our safety center lays out the key components of digital security as well as tips for talking to kids and teens about safety online.
